WE ARE ARCHITECTS
OF ABILITIES

“As my orthopedic surgeon began to unwrap my bandages after my amputation surgery, he asked the prosthesis in the room, **‘will she ever walk again?’** The response surprised me... it was complete silence. And then after about ten seconds, which seemed like an eternity at the time, one person in the back of the room said, **‘if she wants to, she will walk again.’** And that lone voice was RGP Prosthetics.”

"If it does not FIT,
it does not FIT
my lifestyle"

“After my motorcycle accident, it took me about four years to find RPG Prosthetics. Every other prosthetic company I went to was not a fit. My passions include surfing, skateboarding, snowboarding, and rock climbing. So for me, **if my prosthetic leg does not fit, it does not fit my lifestyle!**”

WHAT IS F.I.T.?

Functionally Inspired Technology

1

EVALUATION

- ✓ Complete review of patient's history of prosthetic use and level of motivation for continued use
- ✓ Education and review of the FIT process
- ✓ Clarify functional goals of patient
- ✓ Calendar of expected visits

2

FITTING

- ✓ Casting & physical measurements taken
- ✓ Molding & fitting of sockets
- ✓ Field testing & gait evaluation
- ✓ Adjustment of prosthetic fit
- ✓ Delivery of prosthesis

3

FOLLOW-UP

- ✓ Regularly scheduled appointments allow fine tune of fit & function
- ✓ Frequency dependent upon level of adjustments necessary
